

WE CANNOT FILL YOUR SECOND HAND PLASTIC GALLONS CONTAINERS

IF IT IS TOXIC WITH CHEMICALS

If you deliver to SOS storage and distribution centers (Papar)

We will request you to remove your containers that cannot be washed or cleaned and return them back to us. Your container has a high toxic level and will **only kill and destroy** the living organism within our natural **100% organic fertilizer**. Example the fertilizer will not be effective in a natural organic living form we must have a **CLEAN DRINKING WATER CONTAINERS ONLY**.

Second hand containers must be **food related sources**, any form of fruit juices and food concentrate but ALL must be thoroughly washed out with water before filling with organic fertilizer,

Your plastic second hand gallons cannot contain poison, petrol, diesel, soap or cleaning products or any other chemicals at all.

IT SHOULD NOT HAVE ANY CHEMICAL or DETERGEN SMELL AT ALL.
And you should be able to drink out of your plastic container

There are only 2 options:

- 1- Purchase a new containers
- 2- Find suitable clean **non-toxic second hand plastic** containers. We do sell clean containers.

WHEN IN STORAGE-remember to loosely the cap fully. Do not screwed the cap of lid on tight the liquid must breath it is very alive. More info www.sosorganicfertilizer.com

Above Are Some Of The Example That We Will Not Fill The Containers As Its Kills the Living Organism In Our Fertilizer
